

Data Privacy & Protection Policy

Policy ID	LEG-PR-001
Department	Legal & Compliance
Policy Type	Data Privacy
Version	1.2
Effective Date	2026-02-01
Status	Active
Policy Owner	Privacy Office

1. Purpose

This policy defines requirements for collecting, accessing, using, sharing, retaining, and protecting personal information handled by the company.

2. Scope

It applies to employees, contractors, systems, and business processes that process personal information relating to employees, customers, candidates, suppliers, or other individuals.

3. Data Minimization

Only personal information reasonably required for a documented business purpose should be collected or used.

Employees must avoid collecting additional personal information merely because it may be useful later.

4. Access and Use

Access to personal information must be limited to authorized users with a legitimate business need.

Personal information must be used only for approved business purposes and in accordance with applicable privacy requirements.

5. Sharing and Disclosure

Personal information must not be shared externally unless the recipient, purpose, and transfer are authorized.

Employees must use approved company channels for transferring personal information.

Requests from external parties for personal information must be referred to the Privacy Office when authorization is unclear.

6. Retention and Disposal

Personal information must be retained only for the applicable business, contractual, legal, or regulatory retention period.

Records containing personal information must be securely deleted or disposed of when the retention period ends.

7. Data Breaches and Incidents

Suspected loss, unauthorized disclosure, or unauthorized access involving personal information must be reported immediately through the company incident-reporting process.

Employees must not conceal or delay reporting a suspected privacy incident.

8. Use of External AI Tools

Personal information must not be entered into an external AI service unless the service and processing purpose have been approved under company privacy and security requirements.

Where AI processing is approved, employees must follow applicable data-minimization and access controls.

9. Exceptions

Any exception requires documented approval from the Privacy Office and the relevant data owner.

10. Review and Version History

Policy is reviewed annually and after material changes to privacy requirements or company processing activities.

Version 1.2 — Effective 2026-02-01 — Clarified external sharing and AI-processing requirements.
